9. Tomatoes - a mix
10. Summer squash - large and medium shares
11. Cilantro
12. Farmer's Choice
13. Ornamental pumpkin
14. Herbs

The season is really starting to wind down and we are shifting to fall crops. You will see winter squash, a variety called Sweet Mama. This is a Japanese style kabochia winter squash. Our house what passes for fun is that I grow a lot of different varieties of a crop one year and we have vegetable tasting. Last year one our themes was winter squash. We had a squash taste off and Sweet Mama was a winner. Winter squash actually gets better the colder it gets, so we are holding off on sending you other varieties until gets colder. Also you see we are including some pumpkins. You will be getting a pump a week for the rest of this month, each time it will be a different kind.

Sorry the notice is short, but we are super busy harvesting right now.
